**Roles of Key Partner Organizations in Supporting the National Diabetes Prevention Program**

<table>
<thead>
<tr>
<th>4 Components of the National Diabetes Prevention Program (National DPP)</th>
</tr>
</thead>
</table>

**Examples—Roles of Key Partners (March, 2013)*

- **Training:** Increase Workforce
  - Provide support and funding for Master Training *(CDC)*
  - Develop training materials and train Master Trainers and Lifestyle Coaches *(DTTAC, Y-USA, University of Pittsburgh)*
  - Support and facilitate “Common Ground”, a web-based learning community for Lifestyle Coaches *(DTTAC)*
  - Secure and sustain Lifestyle Coaches to deliver the CDC-Recognized National DPP lifestyle change program *(Delivery Sites)*

- **Recognition Program:** Assure Quality
  - Manage and approve applications for program recognition *(CDC Diabetes Prevention Recognition Program [DPRP]*)
  - Review data submitted by local delivery sites, conduct random audits, and provide technical assistance as needed *(CDC DPRP)*
  - Obtain/maintain recognition from the CDC DPRP; submit participant data as required *(Delivery Sites)*
  - Increase awareness of readiness criteria among organizations interested in applying for CDC recognition to deliver the National DPP lifestyle change program *(CDC, DPCPs)*

- **Intervention Sites:** Deliver the Program
  - Expand the number of sites delivering the CDC-recognized National DPP lifestyle change program; increase access to special populations
    - CDC-funded National Organizations: AADE, America’s Health Insurance Plans, Black Women’s Health Imperative, NACDD, OptimHealth, Y-USA
    - Insurers
    - Employers/Business Coalitions
    - Other Delivery Sites
  - Reimburse for the CDC-recognized National DPP lifestyle change program *(Insurers, employers)*
  - Process claims and collect/analyze program data *(Third Party Administrators: Diabetes Prevention and Control Alliance [DPCA], Viridian Health Management)*
  - Partner with State/Local Government to offer the CDC-recognized National DPP lifestyle change program as a covered health benefit for Medicaid Recipients and Public Employees *(DPCPs, DPCA)*

- **Health Marketing:** Support Program Delivery
  - Lead the design of marketing campaigns and resources *(CDC, Other National Organizations)*
  - Recruit program participants *(Delivery Sites)*
  - Lead/coordinate health communication and marketing campaigns that raise awareness of the following among *people at high risk*:
    - prediabetes risk factors.
    - the location of program delivery sites and how to enroll *(DPCPs, Delivery Sites, Third Party Administrators)*
  - Work with *health care systems* to:
    - raise awareness of how to recognize and treat prediabetes.
    - implement referral systems for people with prediabetes or multiple type 2 diabetes risk factors to program delivery sites *(DPCPs, Third Party Administrators)*
  - Assist 8 DPCPs in building system level support for the National DPP to increase program uptake *(NACDD)*

---

*Decrease new cases of type 2 diabetes for 79 million Americans with prediabetes*

**Note:** The numbers and types of partners will change over time as the National Diabetes Prevention Program continues to grow.
